

PACKAGING SOLUTIONS

Foam Packaging Profiles

Nomaco manufactures a wide variety of packaging profiles, including u-channels, rounds and planks, to protect products and components during storage and shipment.

DESCRIPTION

Nomaco's packaging profiles are used to protect products such as windshields, glass, mirrors, plumbing fixtures, items with sharp edges and much more. Our foam solutions reduce packaging, labor and freight costs and provide protection from denting, scratches and breakage. Our Xtreme™ edge protection profiles incorporate a reinforced plastic channel to prevent sharp edges from breaking through packaging. We offer a wide range of standard shapes and sizes. We can also create a custom profile or plank to meet your requirements.

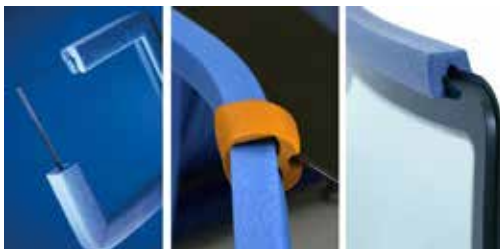

NOMAGREEN™

Nomaco also offers biodegradable and bio-based PE formulations. Our NomaGreen™ formulation was the first biodegradable PE packaging foam in the market. NomaGreen foam has been verified by a third party independent laboratory to meet ASTM D5511 standards for biodegradability. NomaGreen Natural is a bio-based, closed-cell polyethylene made from sugar case. Both formulations can be easily incorporated into edge protection profiles, custom packaging solutions, OEM components or any of the other packaging solutions we offer. They have an indefinite shelf-life, will continue protecting your product for multiple uses, and can easily be recycled in the standard LDPE recycling stream.

For more information on our packaging profiles, or to find out how we can help you develop a custom profile, call us today at 919-269-6500 or email us at info@nomaco.com.

Features

- Turn-key solutions
- Superior cushioning
- Easy to handle
- Closed-cell
- Flexible
- Low abrasion
- Chemically neutral
- Recyclable
- Reusable
- Made in USA
