- ▶ Use as a cooler in extreme heat

Made in the USA

From Comfort
to Structure,
Nomaco foam is
ideal for marine
applications

Partnering with
Nomaco is a
better choice for
your FOAM
needs because...

1

Partnership

As a leader in the design and extrusion of custom engineered foam products, we are committed to creating collaborative partnerships with our customers.

We have been serving a wide range of markets including construction, insulation, home furnishings, packaging, fitness & recreation and more throughout the last four decades.

2

Assessment

Our dedicated sales and engineering personnel listen and work tirelessly with customers to determine the true challenges involved. We take a holistic approach to ensure that we fully understand your objectives, needs and requirements, with the goal of delivering turn-key solutions that exceed expectations.

3

Design

Our experienced team of material engineers, scientists and research experts excel at mastering the complexity of extrusion die design, material formulation and engineering to develop and deliver the best overall solution possible.

4

Results

When you partner with Nomaco, you partner with the innovators in custom foam development. We can achieve geometries and tolerances unmatched by competitors. If you need a custom foam solution, you need Nomaco.

Nomaco manufactures FOAM profiles that are customized to meet your specifications including:

- ▶ Material composition
- ▶ Dimensions
- ▶ Compression
- ▶ Density
- ▶ And much more...ask us how we can help you!
