To Whom It May Concern:

In response to your request for VOC content in Nomaco products, I would like to provide the following information.

- Nomaco uses Isobutane as a blowing agent in the manufacturing of polyethylene foam.
- The L.E.L. for Isobutane is 1.8% or 18,000 PPM.
- Nomaco will not ship foam until the Isobutane level is less than 25% L.E.L.
- The maximum level of V.O.C.'s that could ever be present at a customer's facility from Nomaco product is 0.45%, 4,500 PPM or 4.49 grams per liter.

If we may be of further assistance, please contact us.

Best regards,

Christophe Theunissen
Vice President, Sales
